To Whom This May Concern

Letter of recommendation,

Carl Johan Candelier finished a bachelor's degree in music in Computer Game Development at the University of Skövde in the spring of 2023. The degree is a three-year program focusing on composition of music for computer games and interactive media.

Carl Johan already had a solid background and experience as musician and composer when he started at University of Skövde. I have been a teacher of Carl- Johan in several courses over these three years and I have seen a remarkable progress in his skill in arranging, composing and integration of music in computer games. Carl-Johan is very dedicated and hardworking and delivers work on time. He is very careful, meticulous and pays great attention to detail in his work. His presence in the classroom is an asset because of his positive attitude and eagerness to learn. His latest composition is an arrangement of a piano trio for orchestra. I supervised him on an experimental musique concrete piece and on a collaborative string quartet. I also supervised him in his thesis (C-uppsats) entitled "Music Experience Connected to Emotional Impressions Regarding Atonality, Tonality and Visual Media". The thesis is a study in how trained musicians listens to atonal and tonal music and how they experience the music emotionally. The study was carried out by using qualitative method and it also included compositions of tonal and atonal music. I fully recommend Carl Johan to you without reservation. If you have any further questions regarding his background or qualifications, please do not hesitate to contact me.

Sincerely,

Lars Bröndum
